Beyond Kicking the Tires
Finding the Right Products

Aubrey Francisco, Ph.D.

TECHNOLOGY
Offers HUGE new opportunities to learn.
But it’s hard to match the **right** tools with the **right** teachers and students.
There is a limited meaningful evidence of products’ success.
With these evidence gaps, districts and providers alike rely heavily on pilots.
So, what can be done to run better pilots?
Recommendations for more effective pilots

- Set a clear goal and timeline
- Maintain open communication
- Collect end-user feedback
By working together to improve these practices, we can get the **right products** into the hands of the **right teachers & students**
Help select education’s biggest challenges!
