

# Get Rolling with Data Interoperability

Six factors for implementing interoperability

## TAKE OWNERSHIP

**IS YOUR DISTRICT READY TO MANAGE INCOMING DATA?**

Create a governance structure to manage custody of your data

## VISUALIZE YOUR DATA

**ONCE YOU HAVE YOUR DATA, HOW WILL TEACHERS ACCESS IT?**

Select tools that translate data into useful insights

## BUILD DATA LITERACY

**ARE THERE ACTIONABLE USE CASES FOR INTEROPERABLE DATA?**

Help school staff create, understand, and use data effectively in day-to-day work

## STORE YOUR DATA

**AFTER YOU RECEIVE YOUR DATA, WHERE WILL YOU ARCHIVE IT?**

Establish a data warehouse to archive data and keep it year-over-year

## ENGAGE VENDORS

**DO YOUR VENDORS PROVIDE STANDARDS-COMPLIANT APIs?**

Talk to your vendors about access to secure APIs that meet data standards

## GET YOUR DATA

**WHERE SHOULD VENDORS SEND THE DATA?**

Set up an operational data store to receive data from vendors
