# Write a Flowchart

A **flowchart** shows the steps of a process from beginning to end in a sequence. A flowchart is a way to show an **algorithm.**

↳ *It uses boxes* [   ] *to represent parts of the process and arrows* ⟶ *to show the direction between steps*

↳ *You can also use a diamond* ◇ *to represent a question*

For example, here is a flowchart for the *Three Little Pigs*:

> **Big bad wolf blows on the pigs' houses**

> **What is the house made of?**

straw   **wood**   **brick**

Wolf blows the house down!	**Wolf blows the house down!**	**Wolf does not blow the house down.**

How can you write your own "algorithm" or flowchart?
