# Portrait of a Digital-Ready Classroom

Use this document as a tool to help you develop your district's/school's portrait of a digital-ready classroom.

Part 1: Design Brainstorm

Directions: Collaborate with your district/school leadership team to brainstorm environmental **design components** your digital-ready classrooms need to achieve your portrait of a digitally ready student and digitally ready teacher.

What **technology** components does your classroom design need to support students in active and authentic ways? Examples of technology considerations include power, projection, device infrastructure, and network capabilities.

What **adaptability** components are incorporated to accommodate varying learner needs and abilities? Examples of adaptability features include flexible seating, assistive technology, sensory considerations, and social-emotional support.

What **flexibility** components are incorporated to support the full range of human needs while minimizing distraction? Examples of flexibility considerations include physical grouping space, room layout, temperature, and lighting.

Part 2: Digital-Ready Classroom Portrait

Directions: For each of the design components you identified, create detailed descriptors that explain what a digital-ready classroom will look like. Use action-oriented language. See the example below.

Technology	Digital-ready classrooms… - feature a **robust device infrastructure** with ample charging options, interactive displays, and wireless screen-mirroring to support real-time collaboration, group discussions, and active learning. - are equipped with **high-speed, secure Wi-Fi** that supports multiple devices, enabling access to cloud resources, collaborative tools, virtual labs, and immersive technologies for authentic learning experiences. - feature **adaptive technology**, including assistive tools, advanced audio-visual systems, and mobile teaching stations to support diverse learning needs and enable inclusive, targeted instruction.

[add technology components here]	Digital-ready classrooms… - [add descriptor 1 here with action-oriented language] - [add descriptor 2 here with action-oriented language]

[add adaptability components here]	Digital-ready classrooms… - [add descriptor 1 here with action-oriented language] - [add descriptor 2 here with action-oriented language]

[add flexibility components here]	Digital-ready classrooms… - [add descriptor 1 here with action-oriented language] - [add descriptor 2 here with action-oriented language]
