Subject	**Let's Start a Student Tech Team!**

Dear [Decision Maker],

I believe we should start a student tech team at [School Name]. It would greatly benefit our school community and enhance student learning.

Why a student tech team?
- Involving students in the planning, execution, and day-to-day management of technology programs builds buy-in and support.
- Student tech teams provide opportunities for students to take on leadership roles, develop a STEM-based skill set, and collaborate in an innovative learning environment.
- Student tech teams can help resolve device issues and support the school's technology infrastructure.
- The experiences students gain in a student tech team can have a positive impact on their future plans.

I ask that you consider the potential benefits of starting a student tech team at our school. I would be happy to meet with you to discuss this further and share the resources available in the Student Tech Team Toolkit that can help us get started.

Sincerely,
[Your Name]
[Your Title/Role]
